National Seminar on Smart and Eco-Responsible Civil Engineering

SERCE2026

November 17-18, 2026

About SERCE2026

The National Seminar on **Smart and Eco-Responsible Civil Engineering (SERCE2026)** provides a strategic platform to explore the dual transition of the construction industry toward digitalization and sustainability. By bringing together academic researchers and industry leaders, this event aims to foster innovation in artificial intelligence, promote the development of low-carbon materials, and enhance the resilience of smart infrastructure against environmental challenges. Ultimately, SERCE2026 seeks to bridge the gap between advanced numerical optimization and eco-responsible practices in order to build a safer and more sustainable future.

Key Topics:

- Axis 1: Artificial Intelligence in Civil Engineering
- Axis 2: Sustainable Structures and Numerical Optimization
- Axis 3: Structural Rehabilitation and Smart Monitoring Systems
- Axis 4: Eco-friendly Materials and Life Cycle Assessment
- Axis 5: Geotechnics and Natural Hazards
